

New & Enhanced Air Emissions Reporting Takes Effect January 2020

Important!

Effective January 1, 2020, the California Air Resources Board (CARB) will require enhanced annual reporting of criteria pollutant and toxics air emissions from subject facilities.

Is your facility subject to the new reporting requirements of 17 CCR Section 93400-93410?

Contact me to find out.

Don't err on the side of reporting! California Assembly Bill 617 (AB 617) was signed into law July 2017. Among other things, AB 617 requires the California Air Resources Board (CARB) to develop and implement enhanced emissions reporting of criteria and toxics air pollutants. To meet this requirement, CARB has adopted the Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants (CTR Regulation), effective January 1, 2020, requiring annual reporting of criteria pollutant and toxic air contaminant emissions from subject facilities. Initial reports for calendar year 2019 are due May 1, 2020.

Who Must Report?

Unless otherwise exempt, facilities meeting one or more of the following criteria must report:

- Facilities subject to CARB's GHG reporting rule, including those that submit abbreviated reports
- Facilities located in a non-attainment area and are permitted to emit 250+ tons per year of any non-attainment pollutant
- Facilities categorized as "high priority" for toxics by the local air district

What Must Be Reported?

Facilities must report actual emissions or provide sufficient activity data so that emissions can be calculated by the local air district. Emissions of criteria pollutants and specified toxics must be reported at the device or process level, including direct and fugitive emissions, for each permitted source. Stack parameters and other device specification must also be reported.

How Can Terraphase Help?

Our California-based air quality practitioners are extremely knowledgeable about emission inventory and reporting requirements. Terraphase can:

- Determine if a facility is subject to CTR Regulation reporting
- Provide guidance on reporting deadlines and format
- Assist with data collection and report preparation
- Prepare emission calculations
- Prepare data collection templates for future reporting

KEY DATES

May 1, 2020

Deadline to submit initial reports for calendar year 2019

NOTE: Local air districts may adopt an earlier reporting deadline
